# KLUDI RAK FACTORY AT A GLANCE

Our State-of-the-art manufacturing facility.

Factory at Ras-Al-Khaimah, U.A.E.

## Immaculate design and pioneering technology from Germany

KLUDI is an international family business managed by the third generation of owner. The specialist for bathroom and kitchen mixer taps, showers, bathroom accessories and complete bathroom solutions was founded in Menden in Westphalia in 1926. Since that time, the company has had a decisive impact on development in the sector thanks to its functional, design-oriented product for kitchens and bathrooms. Today the KLUDI Group employs over 1,000 staff worldwide.

KLUDI sells several million bathroom and kitchen mixer taps globally every year as well as showers and accessory articles. KLUDI has its own sales subsidiaries in Austria, the Netherlands, France, Poland, Hungary, the Czech Republic, Slovakia, Romania, Russia, China, Singapore and India.

The KludiRak collection of faucets and other bath solutions are manufactured in the joint-venture manufacturing plant of KLUDI GMBH and RAK Ceramic LLC, set up in 2006, in the emirate of Ras-Al-Khaimah in the U.A.E. the KludiRak range of faucets are manufactured using world-class KLUDI know-how and exacting German quality standards. KludiRak range of bath fittings personifies the perfect marriage of German technology with good economics. The KludiRAK range are sold in diverse markets like the Middle-east, Africa, East Europe and the Indian Sub-continent.

# HARMONY

"HARD TO MEASURE -  
CLEAR TO OBSERVE"

The designs combine contemporary style with high functionality and technology to add a special touch of harmony to your kitchen sink, bathtub, shower, bidet and washbasin.

Innovative features in the Harmony series include swivel cascade aerator solutions that bring greater flexibility to both bathroom and kitchen, by enabling the angle of flow to be adjusted to have different splash options and resemble the natural flow of water.

# PASSION

THE TIMELESS  
INNOVATIVE DESIGN

This classic combination of rounded and angular shapes is a timeless design that fits in well with all architectural bathroom styles. Passion offers innovative solutions, bringing greater flexibility to both bathroom and kitchen. In the bathroom, the shower fitting can rotate 180 degrees and boasts an ultra-flat hand-held shower with a voluminous rain shower spray. In the kitchen the spout can be turned a full 360 degrees, creating plenty of free space at the sink.

# PRIME

THE BEAUTY OF  
GEOMETRIC  
ORDER

In the bathroom the simple, rounded design of this range is characterised by the minimalist handle. It also offers a wide range of different products, in particular for the shower. First choice for any architecturally striking kitchen, Prime rejoices in flowing lines and a curved spout. It is available as a single-lever mixer or a two-hole fitting.

# WE STAND FOR WATER SAVING

Water is one of the most valuable and scarce resources that we have. Here at Kludi Rak we are very aware of this. This is the reason why we use only the best and highest quality aerators on our fittings. An aerator is a key component of every faucet, which is integrated into the spout at the front and forms the water jet.

Save up to  
**60%** water

Constant  
flow rate

And this is how we do it:

We use aerators with which it is possible to achieve a water saving of 60 % at the wash basin compared to regular products. The water flow at the wash basin can therefore be reduced by up to 6 l/min.

For our fittings we also use, amongst others, aerators that make it possible to adjust the jet angle directly on the fitting itself. This has the advantage that individual adjustments can be made to the jet to suit every form of wash basin. Whether upwards to a more shallow outlet angle or downwards in a steeper angle. It also results in less splashback.

We use flow regulators, which ensure a constant flow rate regardless of pressure fluctuations and which guarantee an even distribution of water. An even distribution of water is particularly important in commercial and institutional installations. It also saves water and therefore energy.

Vertical Water Distribution
